RURAL FEDERAL UNIVERSITY OF PERNAMBUCO

USER INTERFACE DOCUMENT

This document will show the design of the HeyFood application. In addition it will show the user interface and how it becomes intuitive during its use.

It is very important to have a consistent and pleasant interface, because most users only use a certain application when the look is nice.

The colors used must reflect the real purpose of the application. Images must be cohesively arranged and font must be readable for everyone to read.

Another caution about background colors is that there has to be a contrast with the font color, otherwise it will be quite difficult to read.

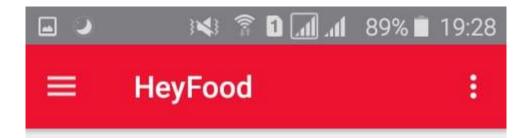

Following are some images captured while using the HeyFood app:
